

MASSARO F1

Mid early hybrid: 98 days. Uniform cylindrical fruits, for processing peeled tomato but also for fresh market and “sun dried” tomato.

Good vigor plant, uniform ripening, capable of very high productivity.

Long slim fruits, cylindrical, average weight 85-90 g, uniform, very good color at full maturity.

Firm fruits, not overripening.

Massaro is an hybrid with high potential for mechanical harvesting.

HR*/IR*: V, Fol 0-1, N, Pst, TSWV.
