

UGI 3329 F1

Type

Chocolate color, indeterminate oxheart tomato.

Cultivation

Suitable to all cultivation cycles under greenhouse both in conventional cultivation and on artificial substrate.

Cycle

Early.

Plant

Balanced, airy and generative. The excellent fertility of flowers guarantees great production performances.

Fruits

Typical oxheart shape, slightly more elongated in the upper clusters. Chocolate color and marked green shoulder. At full ripening it presents a beautiful amaranth color. Very high specific weight and no empty fruits. Excellent resistance to overripening and shelf life. Average weight 180-250 g.

Remarks

Although it is similar to an oxheart tomato, the flavor is strongly better in terms of sweetness, acidity and juiciness.

Resistances/Tolerances

HR*: ToMV/VaVd/Fol:0-2
