

BLACK STAR F1

Hybrid Multivirus and Powdery Mildew highly tolerant. Mid-dark bright green.

Good vigor plant, single stem and open. Easy to pick.

Early ripening.

Very long lasting harvest.

Cylindrical fruits, 20-22 cm length, high quality and very uniform.

Very small peduncle attachment that enable a very easy pick.

Good for processing because of slow seed development.

For protected and open field cultivation.

IR*: Px, PRSV, WMV, ZYMV.
