

Hybrid Tomato Processing Sq/Rd **UG 124 F1**

UG 124 is a mid-early hybrid, 98 days, with the “Field Storage” and “High pigment” gene.

Good vigor plant, very good cover and rusticity with high productivity potential, thanks also to a very high disease package.

Square fruits (70 - 75 g), good thickness and color.

Very good Brix (5,4-5,8°).

Very firm fruits with high overripening resistance due to the “Field Storage” gene.

Also for mid late transplant.

HR*/IR*: V, Fol 0-1, N, Pst, Aal, TSWV - Jointless.
