

Hybrid Tomato Processing Sq/Rd

UG 8168 F1

Early hybrid, 98-100 days, with strong plant, good cover and short internodes.

This hybrid is one of the most productive in all the tomato industry panorama.

Good size fruits (75-85 g), with super thick walls.

Excellent field storage.

Good color (2,2 GD) and Brix (5,4-5,6°) over the average.

Very important multipurpose hybrid. Suggested also for early and mid-early transplant.

HR*/IR*: V, Fol 0-1, N, Pst.
