

## San Marzano

### UGI 1796 F1

#### **Type**

Indeterminate cylindrical/elongated shape tomato.

#### **Cultivation**

Suitable to all cultivation cycles under greenhouse both in conventional cultivation and on artificial substrate.

#### **Cycle**

Early.

#### **Plant**

Generative, airy, rustic with excellent production potential. Genetic resistances make this hybrid one of the few with such package and healthy plant.

#### **Fruits**

Typical elongated oval shape. Very deep green colour turning red at full maturity. In some cultivation conditions it can be harvested when completely red. Average weight 140-150 g.

#### **Remarks**

The plant requires an appropriate irrigation and nutritional inputs.

#### **Resistances/Tolerances**
