

Miniplum, Midiplum and Mini S. Marzano

UGI 1719 16 F1

Type

Indeterminate midi San Marzano tomato.

Cultivation

Suitable to all cultivation cycles under greenhouse, both in conventional cultivation and on artificial substrate.

Cycle

Early.

Plant

Healthy with perfect balance, excellent production potential. Easy to cultivate and reliable even with changing of transplanting date. Good tolerance to apical rottness.

Fruits

Typical elongated prismatic shape. Average weight 40-50 g. Elegant cluster and good firmness on it. Excellent color and consistence. High °Bx. Great shelf life.

Remarks

The plant requires appropriate nutritional inputs, particularly in winter cycles.

Resistances/Tolerances

HR*: ToMV/VaVd/Fol:0-1

IR*: TSWV/TYLCV/MaMiMj
