

Speciality

KOKORO F1

Type

Oxheart tomato.

Cultivation

Suitable to all cultivation cycles under greenhouse both in spring-summer and in autumn-winter.

Cycle

Medium.

Plant

Balanced and very high yields.

Good setting under high temperature.

Fruits

Big size up to upper clusters. Excellent ribs.

Good color with green shoulder.

Average weight 300 g.

Remarks

Very small “placenta” cavity compared to the average type.

Slow color turning during vegetation and after harvest.

High fruits size during all productive cycle.

Resistances/Tolerances

HR*: ToMV/VaVd

IR*: TSWV
